Introduction to the China Family Panel Studies

The China Family Panel Studies (CFPS) is designed to collect data on the same individuals, families, and communities over multiple time periods from a nationally-representative sample in order to capture social development and changes in China, and to provide valid information sources for the society, systematic and scientific data for academic research, and scientific evidence for government policy decisions.

In order to obtain accurate data, please answer the interview questions based upon your actual situation. We apologize for any inconvenience this may cause to your life and work. We appreciate your understanding and support of our work.

In accordance with Article 14 of Chapter 3 of the Statistics Law of the People's Republic of China, any information you provide will be kept confidential without your consent. Any information published in scientific research, policy analysis, and opinion review is aggregated from a large number of questionnaires, rather than specific to you, your family, or your community, and thus your personal information will not be disclosed.

This is the first round of the panel survey carried out by Peking University. All the interviewers and supervisors have received strict professional training. They have adequate knowledge about the relevant content in the Statistics Law of the People's Republic of China, and will abide by the law.

All the interviewers and supervisors wear standard identifications issued by Peking University. If you have any doubt about an interviewer's identity, you are welcome to call 010-62757908 at any time for verification.

We are very grateful for your support and help!

Introduction to the China Family Panel Studies

The China Family Panel Studies (CFPS) is designed to collect data on the same individuals, families, and communities over multiple time periods from a nationally-representative sample in order to capture social development and changes in China, and to provide valid information sources for the society, systematic and scientific data for academic research, and scientific evidence for government policy decisions.

In order to obtain accurate data, please answer the interview questions based upon your actual situation. We apologize for any inconvenience this may cause to your life and work. We appreciate your understanding and support of our work.

In accordance with Article 14 of Chapter 3 of the Statistics Law of the People's Republic of China, any information you provide will be kept confidential without your consent. Any information published in scientific research, policy analysis, and opinion review is aggregated from a large number of questionnaires, rather than specific to you, your family, or your community, and thus your personal information will not be disclosed.

This is the first round of the panel survey carried out by Peking University. All the interviewers and supervisors have received strict professional training. They have adequate knowledge about the relevant content in the Statistics Law of the People's Republic of China, and will abide by the law.

All the interviewers and supervisors wear standard identifications issued by Peking University. If you have any doubt about an interviewer's identity, you are welcome to call 010-62757908 at any time for verification.

We are very grateful for your support and help!

Part A

A1 How far is it from your house (permanent residence) to the nearest bus stop? _______ meters/li (Chinese miles)/kilometers

Interviewer Note: If there is no bus, record -8.

F1: “How far” refers to the distance of the nearest path you choose to get to the bus stop, rather than the direct (Euclidean) distance.

A2 Waiting time for the bus is, on average, _______ minutes.

F1: “Waiting time for the bus” refers to the time duration between when you arrive at the bus stop and when you get on the bus. There may be variations in the waiting time for different buses at different periods of the day. Ask the average time here.

[CAPI] Skip to A4 after answering A2.

A3 Long-distance bus service is:

1. Daily [Continue to A301] 5. Every few days [Skip to A302]

A301 How many long-distance buses are there per day? _______

A302 How many days is there a long-distance bus? _______

F1: “Long-distance bus” refers to the commuting bus for passenger transportation between a city and a village. There are only a few buses each day or only one bus for several days.

A4 Distance between your house and the nearest hospital/medical center: _______ meters/li (Chinese miles)/kilometers.

F1: (1) “Distance” refers to the distance of the nearest path by which you choose to get to the bus stop, rather than the direct (Euclidean) distance.

(2) “Hospital/medical center” means a place equipped with medical staff and facilities to provide general medical care and services, such as a general hospital, town hospital, community hospital, village clinic, or private clinic. Specialized hospitals such as dental clinics or supplementary clinics in drugstores do not count.

A5 How long does it take to get to the nearest hospital/medical center by the fastest means of transportation? _______ minutes/hours

Interviewer Note: Ask the time spent by taking the fastest means of transportation.

F1: (1) “The fastest means of transportation” means the fastest daily means of transportation you take, rather than the fastest among all possible means: if the family has no car, then the time should not be calculated based on the use of a car or the traffic condition.

(2) “Hospital/medical center” means a place equipped with medical staff and facilities to provide general medical care and services, such as a general hospital, town hospital, community hospital, village clinic, or private clinic. Specialized hospitals such as dental clinics or supplementary clinics in drugstores do not count.
A6 Distance between your house and the nearest high school: _______ meters/li (Chinese miles)/kilometers

F1: “Distance” refers to the distance of the nearest path by which you choose to get to the bus stop, rather than the direct (Euclidean) distance.

A7 How long does it take to travel from your house to the business center of the nearest city (town) by using the daily means of transportation: ______ minutes/hours.

Interviewer Note: Ask the time spent taking the most frequently used means of transportation.

F1: (In general term): “Business center of the nearest city (town)” refers to a “town” in a rural area and a “city” in an urban area. It refers to the busiest and most flourishing commercial place near the household. If there are more than two such places, record the more frequently visited one.

F1: (1) “Business center of a city” refers to a central business district in a city where business is highly concentrated, and commercial services are well established and served to customers both within and beyond the local area. The business street is typically of 800 meters or longer, or the business and commercial activities are concentrated in an area of 25 hectares or larger.

(2) “Business center of a town” refers to a commercial center in an rural area where business is highly concentrated, and commercial services are well established and served to customers both within and beyond the local area. The business street is typically 500 meters or longer, or the business and commercial activities are concentrated in an area 25 hectares or larger.

Part B

B1 What kind of water does your family normally use for cooking?

1. River/Lake water  2. Well/Spring water  3. Tap water
7. Pond water  77. Other ______ [Please specify]

F1: (1) “Water used for cooking” refers to tap water in cities and “clean” water in villages, for example. If the water source is “tap water” (also known as “pipe water”), then do not probe its source.

(2) “Cellar water” refers to water stored in a cellar in areas that are short of water. A cellar is a container in a pot shape (jar or bottle shaped, etc.) built underground to store rain.

(3) If there have been changes in the water source, ask what the most frequently used kind of water was in the last 3 months.

B2 What kind of fuel does your family normally use for cooking?

Interviewer Note: if two or more kinds of fuel are used, record the one used for stir-frying.

F1: Refers to the kind of fuel most frequently used in the last 3 months.

B3 What is the electricity condition at your home? [Select only one response]

1. No electricity [Skip to B5]  2. Frequent power outage  3. Occasional power outage
4. Almost no power outage at all
F1: “Electricity condition” refers to whether the family has electricity supplied by an electrical network. To examine whether the household is connected to the electrical network, the interviewer can look around to see if there are lamps in the house.

B301 Estimate the average electricity consumption per month last year: _____ kilowatt hours

B4 Did your family use electricity for production or business last year?
1. Yes 5. No
F1: (In general term): “Electricity for production or business” refers to electricity not used for family lighting or domestic appliances. Any electricity usage related to production is “electricity for production or business”. Record “1” even if the household runs a small grocery store at home which cannot be separated from the living space, indicating that electricity is used for production or business.

F1: There are many kinds of electricity usage in China. For example: electricity for residents’ living, business, farming, production (including electricity for highly-energy consuming industries, low-energy consuming industries, township, and village enterprises), administration and public institution, and so on. Here we want to investigate the electricity used for production, which is electricity used for enterprises, including family workshops.

B5 What kind of restroom/toilet facilities does your family have? [Show card]
1. Indoor flush toilet 2. Outdoor private flush toilet 3. Outdoor public flush toilet
4. Indoor non-flush toilet 5. Outdoor private non-flush toilet 6. Outdoor public non-flush toilet
77. Other [please specify] ______
F1 (In general term): (1) “Restroom” refers to a toilet or a washing room equipped with a toilet.
(2) If there are several toilets, “restroom” here refers to the most frequently used one.
(3) If two households share a toilet with lock, and each of the two families has a key, then it is treated as a private toilet.
F1 (In technical term): “Restroom” refers to the space equipped with excrement container, bathing facilities or reserved bathing space. The function of a rest room includes bathing, excreting, washing face, making up, and washing other things. The space is called a toilet if it is only used for excreting. Here the restroom includes a toilet.

B501 How far is the toilet from the nearest source of drinking water? ________ meters
F1: “Source of drinking water” refers to the main water source for daily family use such as cooking and drinking.

B6 Where do you dump your trash?
5. Anywhere in the open area  6. In the trash area of the building
7. Someone comes to collect it  77. Other ______ [Please specify]

F1: “Dump” means pouring out directly, referring to where to throw the family trash outside -- for example, throwing the domestic waste into the river near the house. If the family use a trash bag to collect the garbage and then throw it onto the open space by the side of the road, record “5”.

B7 Does your family hire a housekeeper or an hourly laborer?

F1 (In general term): (1) “Hourly laborer” refers to a worker paid by the hour, for example, a person who cooks or does cleaning work for the interviewed household. The worker usually leaves after finishing the work and does not live in the interviewed household.
(2) “Housekeeper” is usually a worker paid by the month who does somewhat different work compared to an hourly worker. The housekeeper usually lives in the employer’s household.
(3) A short-time employed laborer such as a person who assists in harvesting during the busy farming time is also treated as an hourly laborer.

F1 (In technical term): “Hourly laborer” refers to a part-time employee who is of legal working age and works for an employer for less than a total of 5 hours and is paid by the hour.

B701 How many housekeepers did your family hire last month? ______
B702 What was the total wage you paid your housekeeper(s) last month? ______
F1: “Total wage” refers to the money or monetary expression of the material substance paid to the housekeepers as their labor rewards.

B703 Beside the wage, how much in other expenses did you pay the housekeeper last month? ______
B704 What is the longest working time a housekeeper ever worked for your family? ______
Interviewer Note: A duration of less than one month is recorded as one month.

B705 Where is this longest-working housekeeper from? ______ Province ______ City/County
F1: “Where” here means the housekeeper’s residential address.

B706 Last month, what was the average total time per week that all hourly laborer(s) worked? ______ hours
Interviewer Note: (1) If the average work time per week was less than 1 hour for all hourly laborers, record 1 hour.
(2) If more than one hourly laborer was hired, “total time” refers to the summed work hours across all laborers.

B707 Last month, what was the average reward per hour paid to the hourly laborer(s)? ______

Interviewer Note: If more than one hourly laborer was employed, “average reward per hour” refers to the total monthly payment for hourly laborers divided by the total number of work hours of all the laborers.

Part C

C1 During this Spring Festival, how many relative families visited your family? ______
Interviewer Note: All visitors, regardless of giving gifts or not, are counted as long as they paid a visit in person.
F1: (1) “This Spring Festival” refers to the Spring Festival that passed at the beginning of this year.
Generally, January 1st in the Chinese lunar calendar is the “Spring Festival”. The duration of Spring
Festival, however, refers to the period from the last mid-December to mid-January of the current lunar
calendar. More specifically, the duration refers to the time period from the Small New Year Day
(December 23rd or 24th) to January 15th in the lunar calendar.
(2) “Relatives” refers to blood relations except for lineal descent relatives, such as aunts and uncles.
(3) “Visit” means relatives come to your house to meet in person.
(4) It also counts if you went back to your parents’ house in your hometown and your relatives visited
your parents.

C2 During this Spring Festival, how many friends visited you? _____
Interviewer Note: All visitors, regardless of giving gifts or not, are counted as long as they paid a visit in
person.

F1: (1) “This Spring Festival” refers to the Spring Festival that passed at the beginning of this year.
Generally, January 1st in the Chinese lunar calendar is the “Spring Festival”. The duration of Spring
Festival, however, refers to the period from the last mid-December to mid-January of the current lunar
calendar. More specifically, the duration refers to the time period from the Small New Year Day
(December 23rd or 24th) to January 15th in the lunar calendar.
(2) “Friends” refers to friends of any kind.
(3) Gatherings at restaurants are not counted.

1. Yes 5. No

F1 (In general term): (1) “Family” refers to the relationships among families with the same surname and
tied together through blood relationships.
(2) “Genealogy” is a name list or family tree showing the relationships among family
members and ancestors.

F1 (In technical term): (1) “Family” is a population group composed of family units according to the blood
relationships of the male members. It is a patriarchal system consisting of smaller
families that have relatively close blood and economic relationships but do not live
together or share foods and wealth.
(2) “Genealogy” (zupu) is also called zongpu, jiachuan, fangpu, jiacheng, pudie, puxi
and so on in Chinese. It is a biographic record of the migration and development of the
family history and the figures of the family. A complete genealogy consists of the name of the genealogy, preface, explanatory notes, origin of the surname, genealogy investigation, genealogy chart, biography, ancestral temple, tomb, rules and standards, the bestowal from the emperor or the royal court, pictures of the ancestors, literature of the family members, name of the editor, and the code number of each genealogy.

C5 Last year, did your family participate in ancestor worship/tomb-sweeping activities?
1. Yes 5. No
F1: “Ancestor worship/tomb-sweeping” is a practice of ancestor memorial ceremony.
F1: Since the traditions differ across regions, ancestor worship/tomb-sweeping activities differ in the form. Some visit the ancestors’ tombs and others go to the ancestral temple. Some put the memorial tablets in proper order in the main hall at home, display sacrificial offerings, and then worship the ancestors in order of seniority. During the worship ceremony among Han people, they usually cook fish, meat and other dishes in bowls showing a luxurious life. Around the Qingming Festival, descendants go to repair the tomb, known as tomb-sweeping.

J201 What was your wage for the last month before your retirement? __________ yuan/month

F1: Refer to the last full month’s income before retirement, including the actual wage, stipend and all other types of formal income from the job.

J3 Do you have any of the following types of welfare, insurances or subsidies [Select all that apply] [Show card]:

1. Public medical insurance  2. Urban Employee Basic Medical Insurance
3. Urban Resident Basic Medical Insurance  4. Supplementary medical insurance
5. New Rural Cooperative Medical System 6. Urban basic pension insurance  
7. Rural pension insurance 8. Supplementary pension insurance  
9. Maternity insurance 10. Unemployment insurance  
15. Public housing funding 16. Rental subsidy  
17. Minimum living allowance 78. None of the above  

F1: (1) Public medical insurance was established based on the instruction on public medical insurance for government officials issued by the State Council in June 1952. The insurance covers government officials, party members, people’s organizations, and employees from the work units that are related to health, education, academics and athletics. Disabled soldiers and college students are also covered. This insurance is financed by the local and central governments and is administered by the department of health or the ministry of finance at different levels. This insurance covers medical costs incurred in receiving outpatient and inpatient care, but not the costs of food, living and transportation. If one has financial difficulty, he/she should be compensated by his/her work unit through the administrative budget.  

(2) Urban Employee Basic Medical Insurance is the material support provided by the state or society to individuals who are injured or sick, i.e. a social security system that provides medical service or economic compensation. According to the decision made by the State Council in December 1998, it is required to establish a new nationwide basic medical insurance system for urban employees. Based on this decision, those who are eligible to be covered should be the employees from the work units that are specified in the basic medical insurance and that pay the insurance premium. The medical insurance plan covers all of the work units in urban areas, including enterprises (state-owned enterprises, collective-owned enterprises, foreign commercial investment companies, private enterprise, etc.), government branches, institutions, social groups, and non-enterprise work units. It is up to the local government to decide whether rural enterprises and their employees should enter the basic medical insurance system. The insurance premium should be contributed by both the employers and employees. The document specifies that the amount contributed by the employer should be around 6% of the total income of the employee, while the amount contributed by the employee should be around 2% of his/her total income. Retired individuals are covered by the medical insurance system but do not need to pay the premium themselves.  

(3) Urban Resident Basic Medical Insurance provides institutional support for basic medical care for unemployed urban residents. It covers the urban residents who have local household registration but are not covered by other types of medical insurance (e.g., Urban Employee Basic Medical Insurance, New Rural Cooperative Medical System, etc.).  

(4) Supplementary medical insurance is a concept related to the basic medical insurance. As the national basic medical insurance system can only meet the basic medical needs of the participants, extra medical care may be supported by other types of medical insurance such as the supplementary
medical insurance. Unlike basic medical insurance, supplementary medical insurance is not required by law and is not mandatory. Instead, it is a voluntary plan for employers and employees. There are two main ways to implement the supplementary medical insurance plan. One is to establish and manage the insurance system according to the insurance principles in an industry. Another is to let a commercial insurance company run the system. The current basic medical insurance for urban employees in China can only meet very basic medical needs with shallow coverage, and does not cover the rural population at all. Thus, the development of supplementary medical insurance will be good for the better implementation of basic medical insurance, improvement in the medical care for urban employees, the meeting of all the citizens’ medical needs, and the prosperity of a harmonious society.

(5) Urban basic pension insurance is also known as the national basic pension insurance, which is a mandatory system established by the government to cover the basic living needs of retirees. Before the 1990s, there was only one type of pension insurance for retirees in China. Since 1991, a multi-level pension insurance system has been established by incorporating basic pension insurance, enterprise supplementary pension insurance, and individual savings pension insurance. Combining social pooling and personal savings accounts, the basic pension insurance is a novel mode created by China. This system is financed the same way as the traditional basic pension insurance, that is, the cost is shared by government, work units and individuals. The basic pension insurance emphasizes social support, and is distributed in a structural way. It emphasizes the differences between the stimulus for personal saving and work contribution. Thus, this system bears the features of traditional social insurance, such as social support, risk diversification, and security, and meanwhile underlines the individual’s sense of self-protection and the stimulus mechanism.

(6) Supplementary pension insurance is established by enterprises to supplement the basic pension insurance. It covers the part of the pension insurance that exceeds the basic pension for employees. It is a type of group life insurance. Enterprise supplementary pension insurance is the core of the multi-level pension system in China. Enterprises are encouraged by the country to establish such an insurance system in collaboration with commercial insurance companies.

(7) Unemployment insurance is a mandatory national insurance system, which is funded by the entire society and provides unemployed individuals with material support. It is one of the most important components of the social security system in China. The social security system includes social insurance, social relief, social welfare, community special care and placement, and social support for workers laid off from state-owned enterprises. The social insurance includes pension insurance, medical insurance, unemployment insurance, work-related injury insurance, and maternity insurance.

(8) Work-related injury insurance is a system through which the government provides support to the workers who are injured, sick, disabled, or dead due to work-related causes as well as their families. According to the current regulation, work-related insurance is paid by the employees rather than the employers.

(9) Insurance is an economic relationship established through contract which combines multiple
individuals’ and groups’ risks, calculates the expense based on the probability of loss, establishes funds, and provides support to those who suffer from loss or have certain financial needs.

(10) Allocation of reformed public housing is housing compensation provided by the state to employees who do not receive housing funds. It is a transitional form of the housing system during the period when the public housing system is being commercialized. The price of the house is not determined by the market, but instead by the government. The price is about the cost of housing construction. People have to meet certain requirements to be eligible for this benefit. There is also a limitation on the housing space that one can purchase, preventing people from buying a large house at a low price and hence wasting state-owned resources. Purchase of state-owned housing has other benefits in addition to low prices. For example, one can enjoy certain discount based on his/her work seniority, title and position. Usually, these public houses are not allowed to enter the open market without maintaining the house ownership for several years.

(11) Housing subsidy is a subsidy provided by the government to help people with housing problems, that is, a work unit converts its funds for construction or housing purchase into housing subsidy. The subsidy is deposited to employees’ accounts on a regular basis, such as monthly, and can be drawn when the employees purchase or rent a house/apartment in the market. The subsidy has three main sources: the funds for housing construction from the government, the work unit’s funds from selling houses, and other channels through which the work unit pools funds. There are three ways of dispensing the subsidy: one-time subsidy, basic subsidy plus one-time subsidy, and monthly subsidy. The first way is mainly designed for senior employees without housing, and is provided when they need to buy a house. The second way is giving a certain amount of money to employees based on their current housing conditions. Monthly subsidy targets junior employees, and is given to them monthly.

P710 Where would you go to see a doctor? [Select only one response]
1. General hospital 2. Specialty hospital
3. Community healthcare center/Township hospital 4. Community healthcare post/village clinic
5. Clinic

F1 (In general term): (1) “General hospital” refers to a so-called “big hospital” where various kinds of diseases can be diagnosed and treated.
(2) “Specialty hospital” refers to a hospital that focuses on specific types of diseases, such as a hospital for obstetrics and gynecology.
(3) “Community healthcare center/Township hospital” refers to a medical facility established at the urban community or township level to treat common diseases.
(4) “Community healthcare post/Village clinic” refers to a medical facility established at the urban community or village level to treat common diseases.
(5) “Clinic” refers to a private clinic, as well as a poorly equipped community/village clinic

F1 (In technical term): (1) “General hospital” is also known as a “third-tier hospital,” which provides nationwide medical service and is capable of providing medical treatment and training and conducting medical research. In China, hospitals are organized as a three-tiered system: the first tier is made up of small hospitals at the street community level; the second tier is made up of county level hospitals; and the third tier is made up of general hospitals.
(2) “Specialty hospital” refers to a hospital that treats patients who suffer from certain kinds of diseases, for example, a hospitals for infectious diseases, dental hospital, orthopedic hospital, and so on. In addition, somespecialty hospitals serve specific subpopulations, including such hospitals as children’s hospital, obstetrics and gynecology hospitals, and the emerging elderly hospitals. These hospitals are, by nature, general hospitals, as they consist of comprehensive medical divisions. It remains controversial whether hospitals of Chinese medicine and hospitals that specialize in combining Chinese and Western medicines are specialty hospitals or not. Here, these hospitals should be considered general hospitals or listed alone.
(3) “Community healthcare center” provides public and basic medical service and is non-profit, which is its fundamental characteristic.
(4) “Clinic” is a type of medical institution that is under the administration of the department of health. “Clinic” is at the same level as a Chinese medicine clinic or ethnic medicine clinic. It is at a lower level compared to hospital, MCH, nursing home, outpatient department, but at a higher level compared to village clinic, emergency center, clinical examination center, special center for disease control, or nursing center.
